

Backpack Scan Dataset

I find 13 items.

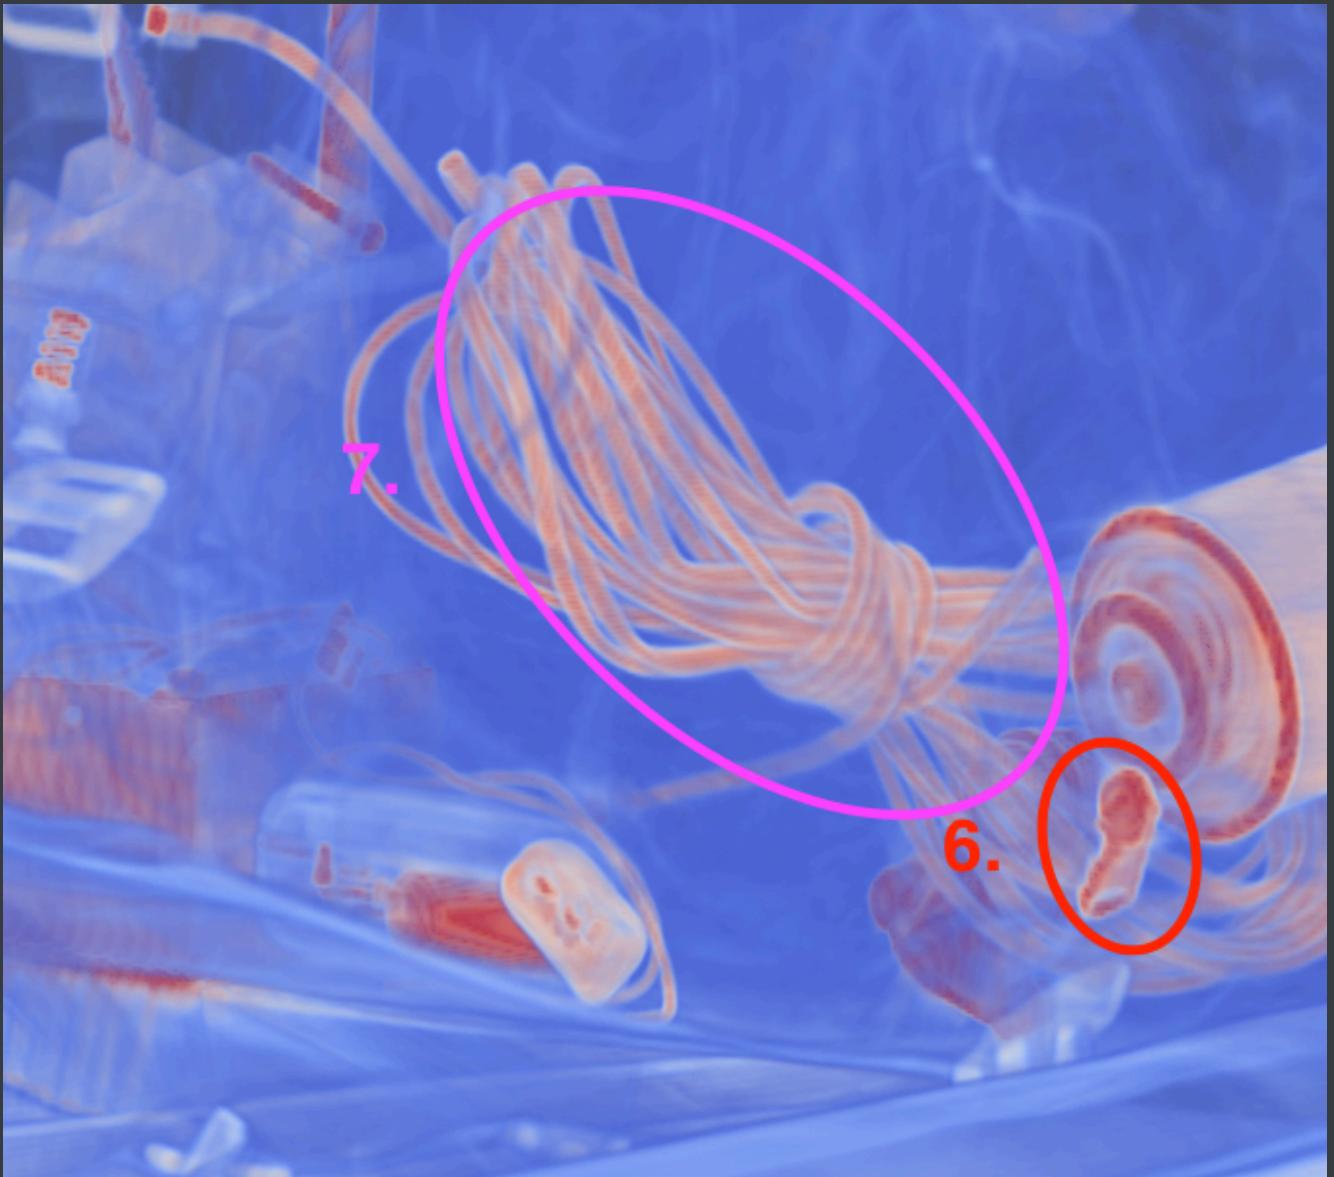

1. The round pills scatter in the backpack I think is medicine or vitamin
2. The round cylinder which is divide into two half is in the following visualization, I think it is the container of the above pills.

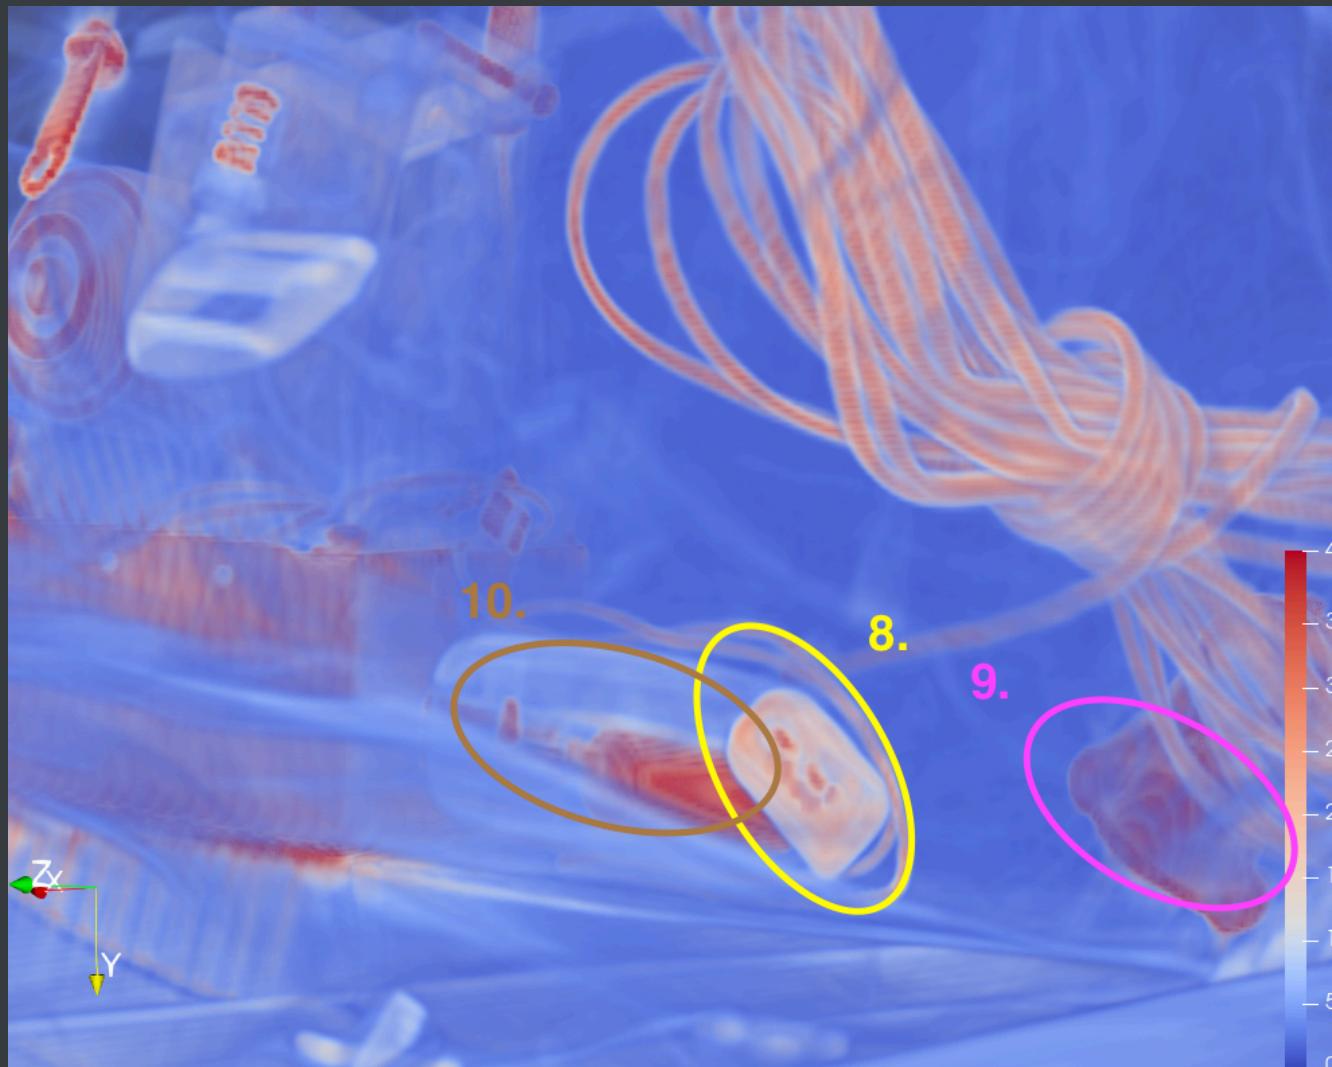

3. The rectangle below the pill container is a box, and there are some wire inside the box, I don't know what is the wire for.
4. There is a long rectangle thing with a circle suspending in the air. Which I think is a zip.
5. The curly item in the right side of the zip I think is the spring.

6. This item which is near the wire is obviously a zip again.
7. The wire on the left of the pill container is thin and long. I think it is the charging cable of cellphone

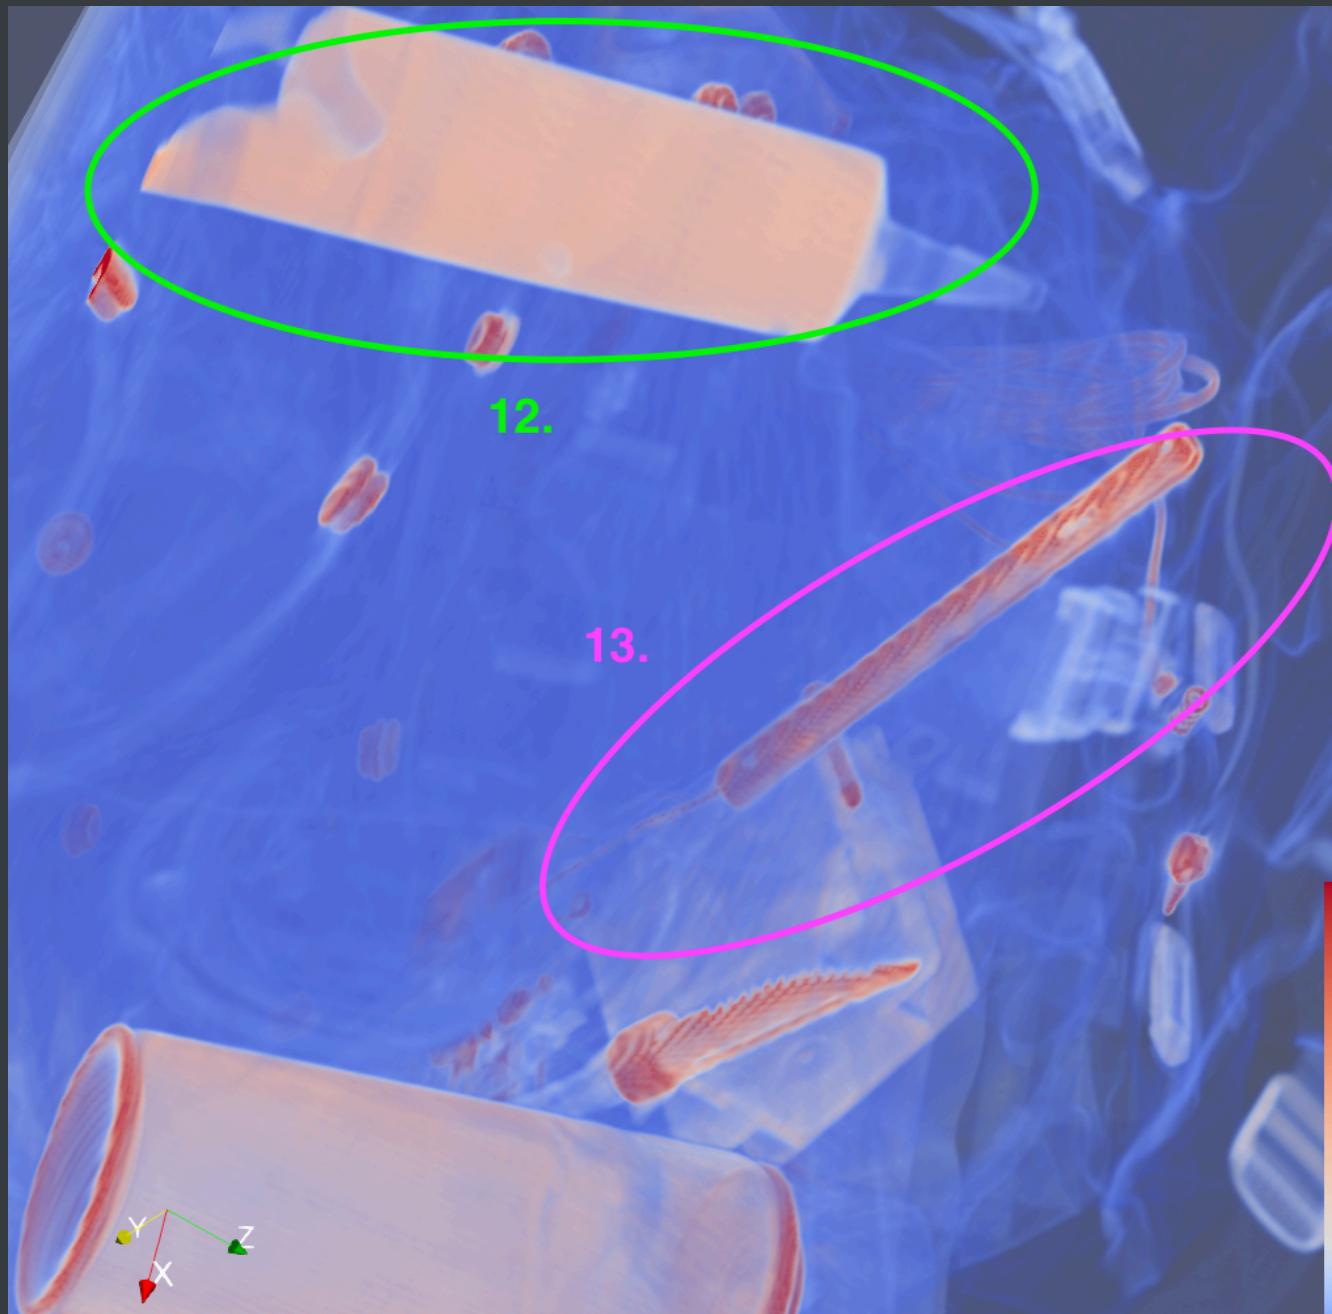

8. It is a small rectangle with something inside and connect to wire. I think it is the USB-A charger head
9. The faucet like item is in front of the wire. I cannot guess what is it actually. Maybe it is a true faucet
10. This is a box contain with something. I think it is a simple storage box

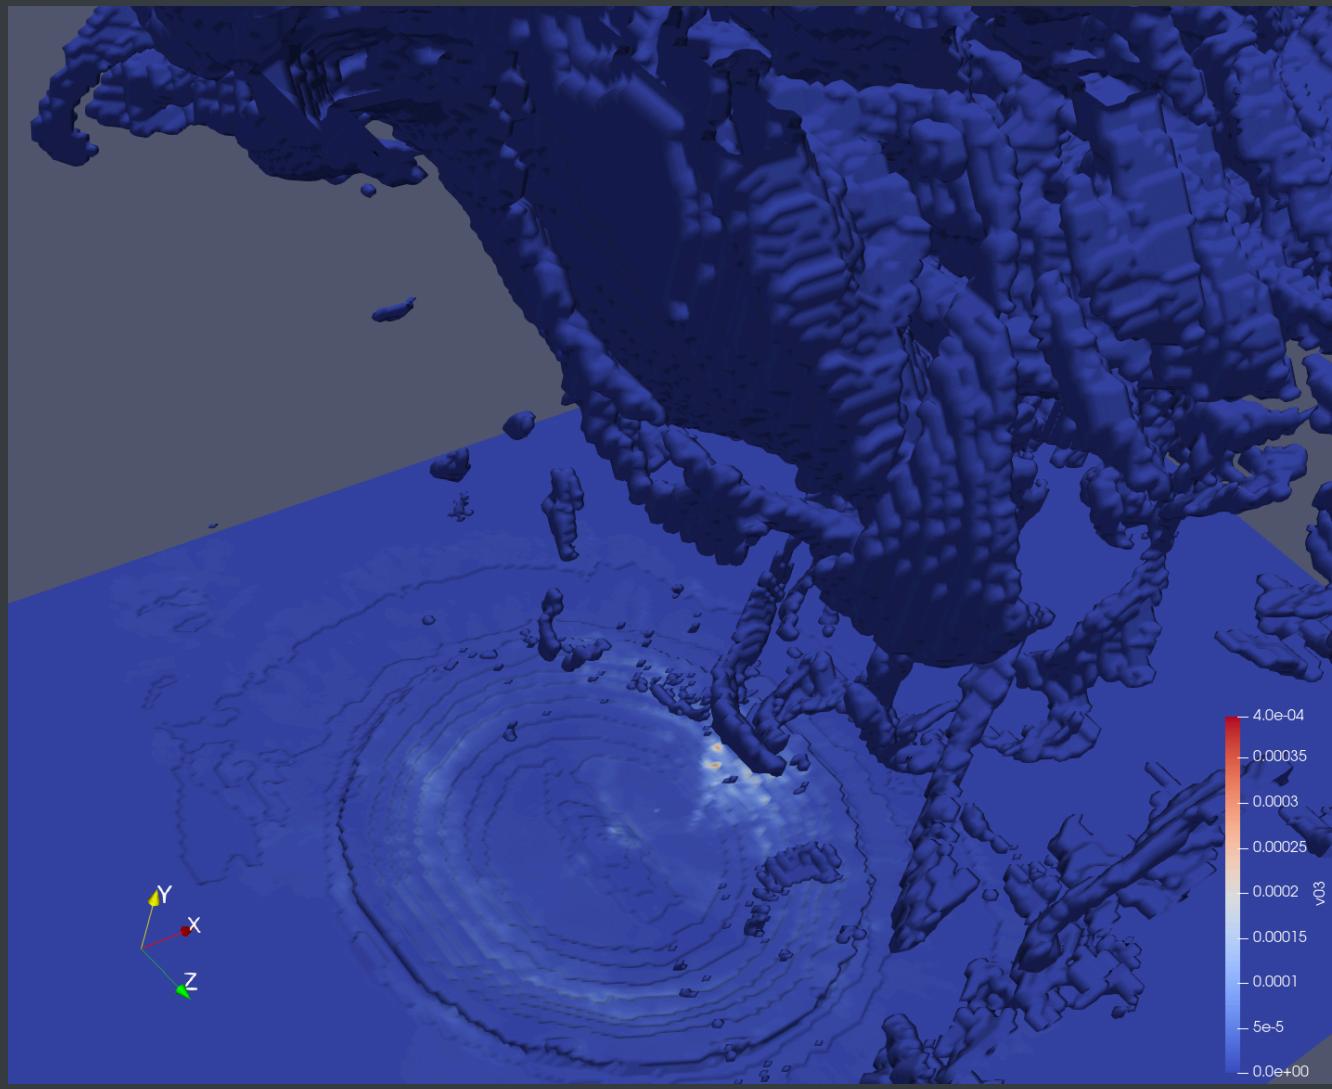

11. The rectangle item in front of the knife has some slots. I think it is a battery of camera.

12. I think the item which float on the air is the sunscreen as it's shape
13. The item in back of the box I think is a fork.

Deep Water Impact Simulation Dataset

1.

2. The answer is yes, I use the surface to cut the region of tsunami
